### **Your Bibliography - REMOVE this title and text for final version**

You need to include an annotated bibliography. This should list all relevant web pages, books, journals etc. that you have consulted in researching your project. Each reference should include an annotation.

The purpose of the section is to understand what sources you are looking at. A correctly formatted list of items and annotations is sufficient. You might go further and make use of bibliographic tools, e.g. BibTeX in a LaTeX document, could be used to provide citations, for example [1] [2] [3, 99-101] [4]. The bibliographic tools are not a requirement, but you are welcome to use them.

You can remove the above *Your Bibliography* section heading because it will be added in by the `renewcommand` which is part of the bibliography. The correct annotated bibliography information is provided below.

## Annotated Bibliography
